HOW IT WORKS

TAKE THE WORK OUT OF YOUR WEEKEND ON THE WATER

INNOVATIVE, PATENTED TRACK SYSTEM

We connect your custom cover to our patented track system so it glides on and off your boat like pulling a curtain. No more snapping, crawling, or sweating.

TAILORED FIT FOR A CLEANER BOAT

We measure and model your boat using state-of-the-art digital tools to craft a one-of-a-kind cover unique to your vessel, ensuring a precise fit for a tighter seal and cleaner boat.

INSTALLATION CUSTOMIZED TO FIT YOUR DOCK

Few docks are the same. Our team will tailor installation based on your dock's needs, and our system uses clamps instead of screws to avoid permanent damage to your dock.

ULTIMATE MARINE-GRADE PROTECTION

Our cover is made from the highest quality marine grade fabric and our materials are curated to withstand the challenging elements of inland lake, coastal, and other marine environments.

ZERO ELECTRICITY. ZERO COMPLEXITY. FULL FUNCTIONALITY.

With our patented track system, your cover glides on and off your boat with a simple pull. It works without power, so it's always dependable, safe, and easy.

TRUSTED BY THOUSANDS OF CUSTOMERS WITH OVER 100 BOAT BRANDS

WHY BOATERS LOVE US

Tyler M. ★★★★★

"Whether just overnight or after several months, every time I uncover my boats they're just as clean as when I left them. **My covers fit perfectly and leave no room for bugs or critters to crawl underneath.** Worth every dollar."
